The profile view diagram illustrates the vertical alignment of Runway 01/19 at Oita Airport. The horizontal axis represents stationing from 17000 to 27000 meters. The left vertical axis shows elevation in meters (0 to 300), and the right vertical axis shows elevation in feet (0 to 100). A dashed line indicates the proposed runway grade, which starts at approximately 100m at station 17000 and descends to about 10m at station 19842, labeled with a "SLOPE 1.2%". At station 19842, there is a sharp vertical curve starting point marked with a circled 'V'. The profile continues as a solid line at a constant elevation of 10m until station 26000, where it meets another vertical curve end point marked with a circled 'V'. From station 26000 to 27000, the profile rises slightly to about 20m. A central box provides declared distances for both RWY 01 and RWY 19, listing values for Take Off Run Available, Take Off Distance Available, Accelerate Stop Distance Available, and Landing Distance Available, all set at 3000m.
